## PREFACE

The first volume in the series "Our Towns" brought out by the Centre for Training & Research in Municipal Administration in the Indian Institute of Public Administration dealt primarily with demographic data pertaining to the more important of our cities. An attempt has also been made therein to incorporate information in regard to the occupation pattern and the income and expenditure of the urban areas covered by that report. Volume One was, therefore, in the nature of a preliminary and basic document and a general reference handbook for all those who are interested in local government in India, particularly those in administrative positions in the urban local bodies.

In this volume, which is the second in that series, an attempt has been made to compile information in regard to the educational and recreational activities of a large number of local governments in the country. The plan for this volume was somewhat more ambitious than what the results have shown. A questionnaire on these two aspects of municipal administration was sent out to all municipalities with a population of 20,000 and above—altogether about 712 in the country. Unfortunately, the response was not as good as we had expected, and only 232 municipalities sent in replies. Apart, thus, from the quantitative inadequacy of the response, the replies delineated, to our disappointment and discomfiture, a picture rather of inertia in both the fields: education and recreation. It is more than likely that in the field of education, most state governments have taken it upon themselves to run and manage the activity. The output of urban local bodies, therefore, is bound to be comparatively poor. So long, however, as education is being fully looked after, if it is at all, it could be a source of satisfaction. In academic or other terms, this might, however, amount to an encroachment on the functions of local government. In the sphere of recreation, unfortunately, very little seems to have been achieved and this serious lacuna must be ascribed either to the paucity of resources or lack of awareness of the importance of recreation in urban life. Possibly, both factors are responsible for this unhappy situation. However, it is felt that a study of this compilation would not only provide a comparative picture of the prevalent situation but also arouse a more animated interest in these subjects, particularly recreation. It will be interesting to note that more than 40 years ago, Herbert Hoover, who became the President of the United States, drew pointed attention to the need of planning for the utilisation of the "time off", having seen its importance to a society which was getting rapidly urbanised. The situation in India today is not very dissimilar to what prevailed in the United States in the twenties: not only is the urban population increasing rapidly but more and more attention is being paid towards reducing working hours for people, thereby creating more leisure. These two factors surely point to the need of more being done for the provision of facilities for the enjoyment of leisure. Too long have local bodies been associated in the public mind in our country with services like conservancy, water supply and road lighting; that they have equally important social and economic functions has not occurred to the urban community with the same urgency and impatience.

The juxtaposition of education and recreation is for obvious reasons: as a man's educational and cultural level rises, his capacity to enjoy leisure intelligently increases. The richer the experience of relaxation, the greater the upliftment of the soul. The combination of educational and recreational facilities for any community results in greater urbanity and social cohesion. Together, they nurture freedom and, as Sartre said — "As soon as man apprehends himself as free and wishes to use his freedom . . . then his activity is play".

The Centre is not only concerned with the imparting of training to the senior and middle levels of municipal employees but is also interested in disseminating useful information on subjects relevant to city governments and in arousing interest in urban problems. It is hoped that this publication and the earlier one, however modest, would somewhat serve the purpose. Not only that, those working in the Centre would hope that in future, urban local bodies would respond more adequately, when their help is sought, towards the preparation of additional volumes in this series. It would not be inappropriate to quote from the preface of the first volume — "Equally, the Centre would welcome suggestions from urban local bodies about the manner in which it can help them and to receive information from them about their cities — all is grist that comes to its mill."

The Centre is grateful to the urban local bodies that responded to the questionnaire and thereby made the preparation of this volume possible. For the designs on the cover, the Centre is beholden to the Town and Country Planning Organisation of the Ministry of Health, Family Planning, Works, Housing and Urban Development of the Government of India.

May, 1970  
New Delhi.

## INTRODUCTION

Urban local bodies all over the world are the primary agencies for ministering to the social, cultural and physical needs of the citizens. They provide for a variety of services and public utilities to meet social and economic needs and to ensure a healthy environment for the community as a whole. Their functions include, for example, those relating to water supply, sewerage and drainage, public health and sanitation, roads and streets, city transport, school health programmes, establishing and maintaining pre-primary and primary schools, registering of births and deaths and vital statistics. The provision of markets, parks, playgrounds, undertaking measures and programmes for the social and moral welfare of the citizens, provision of milk or mid-day meals for school children, and promoting public participation are also among their functions.

An important aspect of the services which urban local bodies provide is that these contribute towards the strengthening of the economic infra-structure or the social overheads. Social overheads like education, health and housing, parks and playgrounds, libraries, museums, community halls, swimming pools, places for entertainment and recreation, etc., are some of the basic amenities necessary for the social development of the city, and the physical well-being of the citizens. In India, most urban local bodies have yet to attain any reasonable standards in this sphere. This study was undertaken to find out the extent of the educational and recreational facilities actually provided by the urban local bodies.

In order to carry out this study a comprehensive questionnaire (Appendix I) was prepared and sent out to all the urban local bodies (cities and towns) having a population of 20,000 and over. According to the 1961 Census of India, there were 764 towns and town-groups in India with a population of 20,000 and above classified as under :

Statement 1  
DISTRIBUTION OF TOWNS IN THE THREE URBAN CLASSES—1961 CENSUS

S. No.	URBAN CLASSES (POPULATION)		TOTAL NUMBER OF TOWNS	PERCENTAGE
1	2		3	4
1.	100,000 and over		107	14.00
	(a) one million and above	7		
	(b) 500,000 to 999,999	5		
	(c) 100,000 to 499,999	95		
		107		
2.	50,000 — 99,999		139	18.19
3.	20,000 — 49,999		518	67.81
			<u>764</u>	<u>100.00</u>
			Total	

SOURCE: Census of India, 1961, Part II-A (i) General Population Tables, p. 272.

Out of these 764 towns, only 712 had some form of municipal government. The questionnaire was sent to these 712 local bodies with necessary guidelines for furnishing the data for the year 1967-68. The respondents were requested to see that the information required in connection with the various questions on educational facilities should pertain to those items only for which provision had been made in the education budget of their municipality/corporation. Similarly, for recreational facilities, the information sought was

in regard to those items which were being financed out of the municipal budget. Any separate provision for technical or vocational education was to be excluded. Only 232 local bodies, or 32.58 per cent of the total, replied to the questionnaire. All the replies received have been analysed although in a number of cases the information and some of the data supplied were incomplete. The following statement gives the various types of local bodies responding to the questionnaire :

Statement 2

DISTRIBUTION OF TOWNS RESPONDING TO THE QUESTIONNAIRE ACCORDING TO THEIR CIVIC STATUS

S. No.	CIVIC STATUS	TOTAL (TOWNS)	PERCENTAGE	CUMULATIVE TOTAL	CUMULATIVE PERCENTAGE
1	2	3	4	5	6
1.	Municipal Corporations	15	6.46	15	6.46
2.	Municipal Councils/Boards	207	89.24	222	95.70
3.	Cantonment Boards	5	2.15	227	97.85
4.	Notified Area Committees	2	0.86	229	98.71
5.	Industrial Township	1	0.43	230	99.14
6.	Nagar Panchayats	2	0.86	232	100.00
	Total	232	100.00	—	—

The state-wise break up of the number of towns to which the questionnaire was sent and those from whom replies were received, together with the percentage of response is given below :

Statement 3

STATE-WISE DISTRIBUTION OF TOWNS AND PERCENTAGE OF RESPONSE

S. No.	STATE	NUMBER OF TOWNS TO WHICH THE QUESTIONNAIRE WAS SENT	NUMBER OF REPLIES RECEIVED	PERCENT RESPONSE
1	2	3	4	5
1.	Andhra Pradesh	67	14	20.90
2.	Assam	10	2	20.00
3.	Bihar	41	3	7.32
4.	Gujarat	55	25	45.45
5.	Haryana	19	7	36.84
6.	Jammu & Kashmir	3	—	—
7.	Kerala	24	6	25.00
8.	Madhya Pradesh	44	8	18.18
9.	Maharashtra	72	32	44.44
10.	Mysore	45	18	40.00
11.	Nagaland	—	—	—
12.	Orissa	11	1	9.09
13.	Punjab	31	20	64.52
14.	Rajasthan	34	7	20.59
15.	Tamil Nadu	90	42	46.67
16.	Uttar Pradesh	92	25	27.17
17.	West Bengal	65	17	26.15
	Union Territories	9	5	55.56
	Total	712	232	32.58

The percentage of response (64.52) was the highest from the Punjab followed by Tamil Nadu (46.67). Not a single reply was received from Jammu and Kashmir. The percentage of response (7.32) was the lowest in the case of Bihar. There are no urban local bodies in Nagaland.

Out of the 232 local bodies that replied to the Questionnaire, 55 clearly stated that they made no allotments for education and 26 had not given information in this regard. One hundred and sixty-four local bodies reported having incurred expenditure on educational activities. One hundred and fifty five local bodies were maintaining schools while another 9 undertook some other educational activities.

## CHAPTER ONE

### LEGAL PROVISIONS UNDER VARIOUS MUNICIPAL AND CORPORATION ACTS

Under the federal set-up in India, education and recreation are State subjects and local government falls exclusively in the State field. Most state municipal acts as well as corporation acts assign educational and recreational activities to the urban local bodies, describing them as obligatory or discretionary functions, or subjects to which the municipal fund can be applied. Comprehensive statements separately for municipalities and corporations are given in Appendices II and III.

In the municipal acts of Andhra Pradesh, Assam, Gujarat, Himachal Pradesh, Kerala, Madhya Pradesh, Tamil Nadu, Orissa and Uttar Pradesh, the provision of primary education is an obligatory function of the local body. In the acts of Bihar, Maharashtra, Mysore, Punjab, Rajasthan and West Bengal, the functions of the local bodies regarding education are discretionary. The Bengal Municipal Act, 1932 provides for an Education Committee also.

In almost all municipal acts, education, other than primary, that is middle and high school, pre-primary or nursery institutions, etc., is treated as a discretionary function of municipalities. The provision of facilities like public libraries, reading rooms, institutions connected with the diffusion of education, museums, technical education, mid-day meals, training of teachers, scholarships, etc., is also mentioned under discretionary functions. The Cantonments Act, 1924 has also made the cantonments responsible for the maintenance of primary schools, while schools other than primary are left to their discretion.

Coming to the recreational activities of urban local bodies, varying references are made in the different municipal acts. In the acts of Himachal Pradesh, Jammu & Kashmir, Punjab and Uttar Pradesh, tree planting, provision of parks and gardens are regarded as obligatory. In the acts of Andhra Pradesh, Bihar, Gujarat, Kerala, Madhya Pradesh, Maharashtra, Mysore, Orissa, Rajasthan, Tamil Nadu, Uttar Pradesh and West Bengal, the recreational activities like providing music, entertainment, public exhibition, radio receiving stations, fairs, zoological and horticultural gardens, etc., are stated to be the discretionary functions of the municipalities. The French Decree of 1880, which continues to be applicable to Pondicherry, also did not specify these functions. The Cantonments Act, 1924 has mentioned the planting of trees as obligatory while the provision of public parks and gardens, as a discretionary function.

The educational and recreational functions are similarly set forth in the municipal corporation acts. These functions are spelt out, more or less, in identical terms in the corporation acts of the states of Kerala, Madhya Pradesh, Uttar Pradesh and West Bengal and the Acts pertaining to the corporations of Hyderabad, Madras, Bombay, Patna and Delhi. They cover wide fields of activity such as provision and maintenance of public libraries and reading rooms, museums, construction and maintenance of schools for primary education, technical and industrial education, mid-day meal centres, secondary and high school education, training of the blind, the deaf and the handicapped children, swimming pools, planting of trees, public parks,

playgrounds, exhibitions, theatres, botanical or zoological gardens, music, horticultural gardens, stadia, gymnasia, etc.

A comparison of the provisions of these municipal acts with the replies received from various local bodies reveals that while education, particularly primary education, received considerable attention except in a few states, recreation has been relatively neglected. Many local bodies are running primary schools and in some cases they are running pre-primary and other educational institutions also. The school equipment and facilities vary considerably in such matters as playgrounds, mid-day meals, libraries, radio sets, etc. In some towns, provision is made even for the free supply of books and scholarships. Similarly, in regard to recreational activities, many urban areas maintain parks and playgrounds. This natural bias towards education when compared with recreational facilities may be due to the more specific legal provisions in the respective acts. It could also be due to general apathy towards institutional arrangements for recreation. The lack of adequate finances also relegates recreational activities to a low priority.

Although local government legislation classifies functions as obligatory and discretionary, there are no in-built safeguards nor is the distinction being closely observed. The result, inevitably, is the neglect of even obligatory functions by the local authorities. Not only are there no physical standards to achieve, there is hardly any correlation between local resources and functions to be discharged. As the Rural-Urban Relationship Committee has observed, the statute should set out the essential duties that must be performed by every municipal body. The municipal bodies should also be given the option to undertake such desirable functions or services as may promote development and generally help in the improvement of community amenities and civic facilities.\*

---

\* Report of the Rural-Urban Relationship Committee, Volume I, p. 18.

## CHAPTER TWO

The local bodies were requested to give their areas and estimates of population for the year 1968. Wherever the information was not supplied by them, the area figures were taken from the Census data of 1961 and the population projection for 1968—i.e.,  $P_t$ —was arrived at by the formula  $P_t = P_0 \left( 1 + \frac{r}{100} \right)^t$  where  $P_0$  is the 1961 population,  $t$  is the time in years up to 1968 and  $r$  the rate of growth of population during the decade 1951-61. The figures so arrived at are given in Table I. The class-wise break up in 1961 and 1968 of these 232 towns is as follows :

### Statement 4

**DISTRIBUTION OF THE FIRST THREE CLASSES OF TOWNS RESPONDING TO THE QUESTIONNAIRE—  
1961 CENSUS AND 1968 ESTIMATED**

S. No.	CLASS OF TOWN	POPULATION RANGE	NUMBER OF TOWNS			
			1961 (Census)	Percentage	1968 (Estimated)	Percentage
1	2	3	4	5	6	7
1.	I	100,000 and over	44	18.96	51	21.98
			1961	1968		
		(a) one million & above	6	6		
		(b) 500,000 to 999,999	2	4		
		(c) 100,000 to 499,999	36	41		
			44	51		
2.	II	50,000 to 99,999	50	21.55	61	26.29
3.	III	20,000 to 49,999	138	59.49	120	51.73
		Total	232	100.00	232	100.00

The population of cities and towns under study covers a wide range, the highest as per 1968 estimates being 5,368,000 people living in Greater Bombay followed by Calcutta with 3,097,072. At the lowest end are Sagar in Mysore with 21,500 and Mangrol in Gujarat with 21,827. The variations in area are given below:

**Statement 5**  
**DISTRIBUTION OF TOWNS ACCORDING TO AREA (1968)**

S. No.	AREA (sq. kms.)	TOTAL TOWNS	PERCENTAGE	CUMULATIVE TOTAL	CUMULATIVE PERCENTAGE
1	2	3	4	5	6
1.	100 and above	6	2.59	6	2.59
2.	50 — 100	17	7.33	23	9.92
3.	20 — 50	45	19.40	68	29.32
4.	10 — 20	80	34.48	148	63.80
5.	5 — 10	60	25.86	208	89.66
6.	Below 5	24	10.34	232	100.00
Total		232	100.00	—	—

Out of the 232 towns, Delhi Corporation had the biggest area (1397.84 sq. kms.)\* followed by Bangalore (501.21 sq. kms.) while on the lowest side were Sunam (Punjab) with 1.50 sq. kms. and Chandpur (U.P.) with 1.53 sq. kms. The close relationship between population and area is evident from the following statement:

**Statement 6**  
**DISTRIBUTION OF TOWNS ACCORDING TO AREA AND POPULATION (1968)**

POPULATION	AREA IN SQUARE KILOMETRES						TOTAL (TOWNS)
	100 & ABOVE	50 TO 100	20 TO 50	10 TO 20	5 TO 10	5 & BELOW	
1	2	3	4	5	6	7	8
1,000,000 & above	4	2	—	—	—	—	6
500,000 to 999,999	1	2	1	—	—	—	4
100,000 to 499,999	—	10	19	10	2	—	41
50,000 to 99,999	1	1	11	30	17	1	61
20,000 to 49,999	—	2	14	40	41	23	120
Total	6	17	45	80	60	24	232

\* This includes the entire rural area of the Union Territory of Delhi. Urban Delhi had an area of 240.84 sq. kms. only.

The correlation coefficient between area and population is found to be 0.72 which is positive and significant which means that there is real correlation between area and population. This implies that as population increases, area of the town also increases.

Generally speaking, density of population per sq. km. is a fair index of the extent of congestion and overcrowding prevailing in a town. On the other hand, the average density may not give a correct picture of the variations in the conditions of living in different parts of a town. The average density may also be affected by the inclusion of large undeveloped areas on the periphery within the municipal boundaries. The Calcutta Corporation with an area of 95.62 sq. kms. only has the highest density of 32,389 persons per sq. km. The next highest density was 19,608 for Chandpur (U.P.) which has a small area of 1.53 sq. kms. followed by Guntur in Andhra Pradesh with an area of 11.55 sq. kms. and density of 19,481 persons per sq. km. Valparai with 238 persons per sq. km. had the smallest density followed by Puliangudi with 596, both in Tamil Nadu. In the case of the Delhi Corporation, which has an area of 1397.84 sq. kms., and an estimated population of 2,955,989 in 1968, as much as 1157 sq. kms. is rural with a population of about 300,000 while urban Delhi with an area of 240.84 sq. kms. had a population of 2,061,758 in 1961 and 2,655,989 in 1968. The density for the urban area works out to be 11,028 while for the Corporation as a whole it is 2,115 persons per sq. km.

Thus, a simple arithmetical relationship between acreage and population cannot always give a true picture of the congestion existing in a town. The variables are the proportion of peripheral areas included in municipal boundaries, the uses of land for industrial, commercial, institutional or residential purposes, the extent of open spaces and green belts provided in the planning and development of a town. Nevertheless, while low densities may have been caused by any of the above factors, high densities are always an indication of the absence of adequate open spaces coupled with a high proportion of built-up areas causing congestion and insanitation. High densities underline the need of recreational facilities. Similarly, the educational facilities required to be provided in an urban area bear a direct relationship to the density of population.

The correlation coefficient between population and amount spent on education in the above 164 towns is 0.62 which is positive and significant. However, per capita expenditure is a better index particularly when dealing with small towns. Comparative figures of per capita amounts allotted and spent are shown in Tables I and II respectively. The distribution of towns according to the per capita expenditure on education is given below:

Statement 9

PER CAPITA EXPENDITURE ON EDUCATION CALCULATED OVER TOTAL POPULATION

S. No.	STATE	NOT SPENDING	INFORMA- TION NOT AVAILABLE	PER CAPITA AMOUNT SPENT IN RUPEES					TOTAL (TOWNS)
				RS. 15 & ABOVE	RS. 10 TO RS. 15	RS. 5 TO RS. 10	RE. 1 TO RS. 5	RE. 1 & LESS

12.	Orissa	—	—	—	—	—	—	1	1
13.	Punjab	14	—	—	—	—	1	5	20
14.	Rajasthan	4	—	—	—	—	—	3	7
15.	Tamil Nadu	4	1	2	2	14	18	1	42
16.	Uttar Pradesh	—	—	—	—	6	18	1	25
17.	West Bengal	1	—	—	—	2	4	10	17
	Union Territories	3	—	1	1	—	—	—	5
	Total	63	5	4	12	49	62	37	232
	Percentage	27.12	2.16	1.72	5.17	21.12	26.72	15.95	100.00
	Total	—	—	4	12	49	62	37	164
	Percentage	—	—	2.44	7.32	29.88	37.80	22.56	100.00
	Cumulative Total	—	—	4	16	65	127	164	—
	Cumulative Percentage	—	—	2.44	9.76	34.64	77.44	100.00	—

Out of 232 local bodies, 63 did not spend any amount on education. Information was not available for five towns. Out of the remaining 164 towns, four spent more than 15 rupees per head of population on education, 12 between 10 to 15 rupees, 49 between 5 to 10 rupees, 62 between 1 to 5 rupees and the remaining 37 below one rupee.

The average per capita expenditure was the highest (Rs. 17.41) in the case of Delhi followed by Limbdi (Rs. 16.46) in Gujarat while the lowest (Re. 0.01) per capita expenditure was that for Kottayam in Kerala and Bidar in Mysore, followed by Sagar in Madhya Pradesh, Batala in Punjab and Siliguri in West Bengal which had a per capita expenditure of Re. 0.10 in each case. Most of these towns were not maintaining schools.

Substantial grants are received (Table II) by various urban local bodies in different states towards the maintenance of schools as is evident from the following statement:

Statement 10

DISTRIBUTION OF TOWNS ACCORDING TO THE PERCENTAGE OF GRANTS RECEIVED

7.	Kerala	1	—	—	—	—	—	—	1
8.	Madhya Pradesh	1	—	—	—	—	1	1	3
9.	Maharashtra	2	3	3	10	5	1	—	24
10.	Mysore	3	3	3	1	1	3	—	14
11.	Nagaland	—	—	—	—	—	—	—	—
12.	Orissa	1	—	—	—	—	—	—	1
13.	Punjab	5	—	—	—	—	—	1	6
14.	Rajasthan	1	—	1	—	—	—	1	3
15.	Tamil Nadu	—	3	2	13	15	4	—	37
16.	Uttar Pradesh	1	3	12	6	1	1	1	25
17.	West Bengal	5	1	1	—	2	3	4	16
	Union Territories	—	—	—	2	—	—	—	2
	Total	24	17	29	37	30	17	10	164
	Percentage	14.63	10.37	17.68	22.56	18.29	10.37	6.10	100.00
	Cumulative Total	24	41	70	107	137	154	164	—
	Cumulative Percentage	14.63	26.94	44.22	66.78	85.07	95.44	100.00	—

There is variation in the percentage of grants given to different towns even within the same state. In three towns the grant received was in excess of the expenditure. Seventeen towns received more than 80 per cent as grant, 29 towns between 60 per cent and 80 per cent, 37 towns between 40 per cent and 60 per cent, 30 towns between 20 per cent and 40 per cent, 17 towns between 10 per cent and 20 per cent, while the remaining 10 received 10 per cent or less. Twenty-four towns did not receive any grants even though they were spending some amounts on education.

A small part of the expenditure is met from out of fees. In almost all the urban areas, primary education is free while fees are generally charged from pre-primary and higher schools. The percentage contribution of fees towards the total expenditure on education is given in Table II. It varies from 0.01 to 34.11 per cent. According to the Report of the Education Commission, receipts from fees represented 20.4 per cent of the total expenditure on education in India in 1950-51 and was estimated to be 15.3 per cent in 1965-66. The percentage of government grants increased from 57.1 per cent in 1950-51 to 71.2 per cent in 1965-66.\*

---

\* Report of the Education Commission (1964-66), p. 109.

## CHAPTER FOUR

### DISTRIBUTION OF EXPENDITURE BETWEEN PRE-PRIMARY, PRIMARY AND OTHER EDUCATION

As stated earlier, out of the 232 towns, 55 towns did not have any educational programmes and 26 towns did not supply any information about allotment of funds. But from their reports on actual expenditure it appeared that 63 had not spent any money on education. Five towns did not report about actual expenditure. Out of the 164 towns which incurred expenditure on education, 46 towns maintained only primary schools and 76 ran both primary and other institutions. Five towns spent all the money on pre-primary education. This reveals that in most of the urban local authorities, priority is given to primary education due to the legal provisions. Even though the expenditure on education is shared between pre-primary and primary education in some towns, the money allotted to primary education is high. The detailed figures are given in Table III.

In the case of pre-primary education, expenditure per school in different towns ranged from Rs. 1,025 to Rs. 68,000; in the case of primary education from Rs. 1,282 to Rs. 75,767, while in the case of other education it ranged from Rs. 226 to Rs. 368,187.

In Andhra Pradesh, the average expenditure per school varied from Rs. 6,643 to Rs. 11,839 in the case of primary and from Rs. 31,584 to Rs. 259,853 in the case of other education.

In Gujarat, the average expenditure per school ranged between Rs. 1,025 and Rs. 58,924 for pre-primary schools; from Rs. 3,528 to Rs. 44,420 in the case of primary and from Rs. 12,540 to Rs. 195,045 in the case of the other institutions.

In Mysore, the average expenditure per school varied from Rs. 13,252 to Rs. 72,205 in primary and from Rs. 2,210 to Rs. 101,628 in other education.

In Maharashtra, the range was from Rs. 3,114 to Rs. 12,731 for pre-primary, from Rs. 8,478 to Rs. 75,767 for primary and from Rs. 1,558 to Rs. 241,326 in other education.

In Tamil Nadu, it varied from Rs. 6,063 to Rs. 52,474 in primary and from Rs. 22,043 to Rs. 368,187 in other education.

In Uttar Pradesh, it ranged from Rs. 2,128 to Rs. 26,714 in primary and from Rs. 1,053 to Rs. 97,271 in other education.

In West Bengal, it varied from Rs. 5,866 to Rs. 44,682 in primary and from Rs. 226 to Rs. 41,767 in other education.

These variations could be due to the size of the institutions, their enrolment and general equipment.

# CHAPTER FIVE

## NUMBER OF SCHOOLS AND THEIR ENROLMENT

Only 155 of the 232 local bodies were maintaining schools. The variations in the number of schools in different towns are given below:

Statement 11  
DISTRIBUTION OF TOWNS ACCORDING TO THE NUMBER OF SCHOOLS

S. No.	STATE	NUMBER OF SCHOOLS						TOTAL (TOWNS)
		100 AND OVER	50 TO 100	20 TO 50	10 TO 20	5 TO 10	5 AND LESS	
1	2	3	4	5	6	7	8	9
1.	Andhra Pradesh	—	3	4	5	—	—	10
2.	Assam	—	—	—	—	—	1	1
3.	Bihar	—	1	—	2	—	—	3
4.	Gujarat	1	1	4	2	3	7	18
5.	Haryana	—	—	—	—	—	—	—
6.	Jammu & Kashmir	—	—	—	—	—	—	—
7.	Kerala	—	—	—	—	—	—	—
8.	Madhya Pradesh	—	—	1	—	—	3	4
9.	Maharashtra	3	3	6	5	4	2	23
10.	Mysore	—	2	1	—	1	8	12
11.	Nagaland	—	—	—	—	—	—	—
12.	Orissa	—	—	—	—	—	—	—
13.	Punjab	—	—	—	—	1	—	1
14.	Rajasthan	—	—	—	—	—	2	2
15.	Tamil Nadu	1	—	5	12	15	6	39
16.	Uttar Pradesh	3	4	6	8	2	2	25
17.	West Bengal	1	—	5	1	—	8	15
	Union Territories	1	—	—	—	1	—	2
	Total	10	14	32	33	27	39	155
	Percentage	6.45	9.03	20.64	21.29	17.42	25.17	100.00
	Cumulative Total	10	24	56	89	116	145	—
	Cumulative Percentage	6.45	15.48	36.12	57.41	74.83	100.00	—

Thus out of 155 towns, 10 were maintaining 100 and more schools, 14 between 50 and 100 schools, 32 between 20 and 50, 33 between 10 and 20 schools, 27 between 5 and 10 and the rest 39 were maintaining 5 schools or less.

The average number of pupils per school separately for pre-primary, primary and other institutions is given in Table IV. It varies from 50 to 977 for primary schools, 25 to 625 for pre-primary and 28 to 3210 for others.

The number of pupils per school is an important index of the utilisation of school facilities and the cost of education. The size also has a bearing on the methods of school organisation, class room practices, programmes of school improvement, etc. In this connection, it may be useful to compare these figures with the figures obtained by the Second All India Educational Survey. On an average, a primary school in India has 104 pupils. In the rural areas, the average enrolment in a primary school is 90 and the corresponding figure for the urban areas is 226.\* There is considerable variation amongst the towns regarding the average enrolment in pre-primary, primary and other educational institutions. If we take 226 as the normal average enrolment for a primary school in an urban area, 77 towns had a higher average enrolment while 52 towns had a lower average.

---

\* Second All India Educational Survey, NCERT, 1967, p. 25.

## CHAPTER SIX

### NUMBER OF TEACHERS AND TEACHER-PUPIL RATIO

The distribution of the towns according to the number of schools maintained by them has been discussed in the previous chapter. Table V gives the total number of teachers, average number of teachers per school and the number of pupils per teacher. The distribution of towns according to the number of teachers employed in their schools was as follows:

Statement 12

#### DISTRIBUTION OF TOWNS ACCORDING TO THE NUMBER OF TEACHERS IN EACH URBAN LOCAL BODY

S. No.	STATE	NUMBER OF TEACHERS								TOTAL (TOWNS)
		1000 & OVER	500 TO 999	200 TO 499	100 TO 199	50 TO 99	20 TO 49	10 TO 19	1 TO 9	
1	2	3	4	5	6	7	8	9	10	11
1.	Andhra Pradesh	—	1	4	2	3	—	—	—	10
2.	Assam	—	—	—	—	—	—	—	1	1
3.	Bihar	—	—	1	—	2	—	—	—	3
4.	Gujarat	2	1	3	2	4	1	1	4	18
5.	Haryana	—	—	—	—	—	—	—	—	—
6.	Jammu & Kashmir	—	—	—	—	—	—	—	—	—
7.	Kerala	—	—	—	—	—	—	—	—	—
8.	Madhya Pradesh	—	—	1	—	—	—	1	2	4
9.	Maharashtra	3	2	6	7	4	1	—	—	23
10.	Mysore	—	1	2	—	1	5	2	1	12
11.	Nagaland	—	—	—	—	—	—	—	—	—
12.	Orissa	—	—	—	—	—	—	—	—	—
13.	Punjab	—	—	—	—	1	—	—	—	1
14.	Rajasthan	—	—	—	—	—	—	—	—	—
15.	Tamil Nadu	1	1	5	11	11	9	1	—	39
16.	Uttar Pradesh	1	1	6	4	8	3	—	1	24
17.	West Bengal	1	—	1	1	4	2	3	3	15
	Union Territories	1	—	—	—	1	—	—	—	2
	Total	9	7	29	27	39	21	8	14	154
	Percentage	5.84	4.54	18.83	17.53	25.32	13.64	5.19	9.11	100.00
	Cumulative Total	9	16	45	72	111	132	140	154	—
	Cumulative Percentage	5.84	10.38	29.21	46.74	72.06	85.70	90.89	100.00	—

Out of the 155 towns which were managing schools, one town did not supply the information about teachers. Of the remaining 154 towns, 9, *i.e.*, 5.84 per cent were having more than 1000 teachers in their schools, 7, *i.e.*, 4.54 per cent between 500 and 999, 29, *i.e.*, 18.83 per cent between 200 and 499, 27, *i.e.*, 17.53 per cent between 100 and 199, 39, *i.e.*, 25.32 per cent between 50 and 99, 21, *i.e.*, 13.64 per cent between 20 and 49, 8, *i.e.*, 5.19 per cent between 10 and 19, and the remaining 14, *i.e.*, 9.11 per cent had less than 10 teachers. The total number of teachers varied from 58 to 566 in different towns of Andhra Pradesh, from 56 to 445 in Bihar, from 2 to 4,375 in Gujarat, from 1 to 259 in Madhya Pradesh, from 4 to 730 in Mysore, from 47 to 14,382 in Maharashtra, from 21 to 5,851 in Tamil Nadu, from 4 to 1,113 in Uttar Pradesh and from 3 to 1,489 in West Bengal.

It will be interesting to examine also the position in regard to the average number of teachers per school in different towns. In the case of pre-primary education, the average number of teachers per school varied from 1 to 5 in the towns of Gujarat, from 1 to 11 in Madhya Pradesh, from 1 to 2 in Maharashtra and from 2 to 14 in Uttar Pradesh.

The distribution of towns according to the average number of teachers per primary school was as follows:

**Statement 13**  
**DISTRIBUTION OF TOWNS ACCORDING TO THE AVERAGE NUMBER OF TEACHERS**  
**FOR A PRIMARY SCHOOL**

S. No.	STATE	AVERAGE NUMBER OF TEACHERS PER PRIMARY SCHOOL											TOTAL (TOWNS)
		More than 10	10	9	8	7	6	5	4	3	2	1	
1	2	3	4	5	6	7	8	9	10	11	12	13	14
1.	Andhra Pradesh	—	—	—	—	—	3	4	2	1	—	—	10
2.	Assam	—	—	—	—	—	—	—	—	—	—	—	—
3.	Bihar	—	—	—	—	—	1	—	—	1	1	—	3
4.	Gujarat	6	2	—	2	—	1	—	—	—	—	—	11
5.	Haryana	—	—	—	—	—	—	—	—	—	—	—	—
6.	Jammu & Kashmir	—	—	—	—	—	—	—	—	—	—	—	—
7.	Kerala	—	—	—	—	—	—	—	—	—	—	—	—
8.	Madhya Pradesh	—	—	—	—	—	1	—	—	—	—	—	1
9.	Maharashtra	7	4	3	5	3	—	—	—	—	—	—	22
10.	Mysore	2	—	1	1	—	—	—	—	—	—	1	5
11.	Nagaland	—	—	—	—	—	—	—	—	—	—	—	—
12.	Orissa	—	—	—	—	—	—	—	—	—	—	—	—
13.	Punjab	—	—	—	—	—	—	1	—	—	—	—	1
14.	Rajasthan	—	—	—	—	—	—	1	—	—	—	—	1
15.	Tamil Nadu	10	3	2	5	3	8	3	1	2	—	—	37
16.	Uttar Pradesh	—	—	—	—	2	3	7	10	1	1	—	24
17.	West Bengal	—	—	—	—	—	4	2	5	1	1	—	13
	Union Territories	1	—	—	1	—	—	—	—	—	—	—	2
	Total	26	9	6	14	8	21	18	18	6	3	1	130
	Percentage	20.00	6.92	4.61	10.77	6.15	16.15	13.85	13.85	4.61	2.32	0.77	100.00
	Cumulative Total	26	35	41	55	63	84	102	120	126	129	130	—
	Cumulative Percentage	20.00	26.92	31.53	42.30	48.45	64.60	78.45	92.30	96.91	96.91	99.23	100.00

Out of the 130 towns for which the data about the average number of teachers per primary school were available, only one town has one teacher per school, 3, *i.e.*, 2.32 per cent of the towns, 2 teachers; 6, *i.e.*, 4.61 per cent 3 teachers; 18, *i.e.*, 13.85 per cent 4 teachers; another 18, *i.e.*, 13.85 per cent 5 teachers; 21, *i.e.*, 16.15 per cent 6 teachers; 8 *i.e.*, 6.15 per cent 7 teachers; 14, *i.e.*, 10.77 per cent 8 teachers; 6, *i.e.*, 4.61 per cent 9 teachers; 9, *i.e.*, 6.92 per cent 10 teachers; and the remaining 26, *i.e.*, 20.00 per cent, more than 10 teachers.

The average number of teachers per primary school is two in the rural areas and six in the urban areas.\* The all-India average comes to three teachers per primary school. On an average 63, *i.e.*, 48.46 per cent of towns, had more than 6 teachers per primary school, while 46, *i.e.*, 35.38 per cent, had below this number.

There was a considerable variation in the number of teachers per primary school among the various towns. The average number of teachers per primary school varied from 3 to 6 in the towns of Andhra Pradesh, from 3 to 17 in Gujarat, from 1 to 30 in Mysore, from 7 to 33 in Maharashtra, from 3 to 16 in Tamil Nadu, from 2 to 7 in Uttar Pradesh and from 2 to 15 in West Bengal.

In the case of schools other than pre-primary and primary, the average number of teachers varied from 12 to 75 in the towns of Andhra Pradesh, from 6 to 43 in Gujarat, from 10 to 44 in Mysore, from 1 to 47 in Maharashtra, from 6 to 56 in Tamil Nadu, from 3 to 16 in Uttar Pradesh and from 1 to 8 in West Bengal.

The teacher-pupil ratio is a more important index, both of the utilisation of a teacher's services and the extent of attention he can give to his pupils. The phenomenal expansion of primary and secondary education in recent years has resulted in overcrowding in schools, particularly in urban areas, where accommodation is not easily available. A class of sixty children is a common sight in a city.†

Table V gives the teacher-pupil ratio in pre-primary, primary and other educational institutions separately. In the case of pre-primary education, the number of pupils per teacher varied from 27 to 70 in the towns of Gujarat, from 25 to 71 in Maharashtra, from 39 to 99 in Tamil Nadu, and from 13 to 23 in Uttar Pradesh.

The distribution of the towns according to the teacher-pupil ratio at primary stage is given in Statement 14.

Out of the 129 towns for which the data about the teacher-pupil ratio at the primary stage were available, 4, *i.e.*, 3.10 per cent of the towns had a teacher-pupil ratio of 60 and above, 3, *i.e.*, 2.33 per cent between 50 and 59, 43, *i.e.*, 33.33 per cent between 40 and 49, 66, *i.e.*, 51.16 per cent between 30 and 39, 9, *i.e.*, 6.98 per cent between 20 and 29, and the remaining 4, *i.e.*, 3.10 per cent below 19.

The teacher-pupil ratio was the highest (1 : 91) in Arcot in Tamil Nadu followed by Hathras (1 : 77) in Uttar Pradesh while it was the lowest (1 : 12) in Valparai in Tamil Nadu followed by Poona Cantonment (1 : 15) in Maharashtra. This points to the problem of more teachers in schools with relatively small enrolment and inadequate number of teachers in schools with relatively large enrolment. It has been often recommended that the teacher pupil ratio at the primary stage should not exceed 1 : 40.‡ Only 40 towns, *i.e.*, 31.01 per cent of the towns exceeded the above limit while 79, *i.e.*, 61.24 per cent were more liberally provided with teachers. Only 13, *i.e.*, 10.08 per cent of the towns, however, had one teacher for less than 30 pupils.

The teacher pupil ratio in primary schools varied from 30 to 63 in the towns of Andhra Pradesh, from 32 to 49 in Gujarat, from 31 to 50 in Mysore, from 15 to 45 in Maharashtra, from 12 to 91 in Tamil Nadu, from 32 to 77 in Uttar Pradesh and from 30 to 48 in West Bengal.

The teacher-pupil ratio in institutions other than pre-primary and primary varied from 24 to 43 in the towns of Andhra Pradesh, from 24 to 34 in Gujarat from 29 to 143 in Mysore, from 20 to 80 in Maharashtra, from 21 to 79 in Tamil Nadu, from 7 to 67 in Uttar Pradesh and from 21 to 34 in West Bengal.

	Total	4	3	43	66	9	4	129
	Percentage	3.10	2.33	33.33	51.16	6.98	3.10	100.00
	Cumulative Total	4	7	50	116	125	129	—
	Cumulative Percentage	3.10	5.43	38.76	89.92	96.90	100.00	—

Universal provision of schooling facilities at the primary stage implies the provision of primary schools within easy walking distance from the home of every child. The average distance of school to residence for every town is given in Table V. The average distance a child has to cover to go to the pre-primary school ranged from 0.20 kms. to 3.00 kms. in different towns.

The distribution of the towns according to the average distance a child had to cover to go to a primary school is given in the following Statement :

Statement 15

**DISTRIBUTION OF THE TOWNS ACCORDING TO THE AVERAGE DISTANCE A CHILD HAS TO COVER TO GO TO THE PRIMARY SCHOOL**

S. No.	STATE	AVERAGE DISTANCE IN KILOMETRES					TOTAL (TOWNS)
		Beyond 2 kms.	1.51 to 2.00	1.01 to 1.50	0.51 to 1.00	Below 0.50	
1	2	3	4	5	6	7	8
1.	Andhra Pradesh	—	—	—	—	7	7
2.	Assam	—	—	—	—	—	—
3.	Bihar	—	1	—	—	2	3
4.	Gujarat	—	1	—	4	7	12
5.	Haryana	—	—	—	—	—	—
6.	Jammu & Kashmir	—	—	—	—	—	—
7.	Kerala	—	—	—	—	—	—
8.	Madhya Pradesh	—	—	—	—	1	1
9.	Maharashtra	—	1	—	4	16	21
10.	Mysore	—	1	—	2	1	4
11.	Nagaland	—	—	—	—	—	—
12.	Orissa	—	—	—	—	—	—
13.	Punjab	—	1	—	—	—	1
14.	Rajasthan	—	—	—	1	—	1
15.	Tamil Nadu	—	3	1	14	18	36
16.	Uttar Pradesh	—	2	1	8	12	23
17.	West Bengal	1	3	—	4	6	14
	Union Territories	—	1	—	1	—	2
Total		1	14	2	38	70	125
Percentage		0.80	11.20	1.60	30.40	56.00	100.00
Cumulative Total		1	15	17	55	125	—
Cumulative Percentage		0.80	12.00	13.60	44.00	100.00	—

In 108 out of the 125 towns for which the data are available, the average was less than 1 km. and a good majority did not have to travel even half a kilometre. In one town, the average distance was more than 2 kms., in 16, *i.e.*, 12.80 per cent of the towns, it was between, 1.00 and 2.00 kms. and in 38, *i.e.*, 30.40 per cent of the towns between 0.50 and 1.00 kms. and in the remaining 70, *i.e.*, 56.00 per cent of the towns, below 0.50 kms.

The average distance a child has to cover to go to the primary school varied from 0.20 to 0.50 km. in the different towns of Andhra Pradesh, from 0.25 to 1.62 km. in Bihar, from 0.20 to 2.00 kms. in Uttar Pradesh and Gujarat, from 0.40 to 1.61 kms. in Mysore, from 0.20 to 1.60 kms. in Maharashtra, from 0.10 to 2.00 kms. in Tamil Nadu and from 0.25 to 3.00 kms. in West Bengal. The norm of the one kilometre distance would be satisfactory in determining the location of new schools in different localities of a town, provided it does not involve crossing of main traffic roads.

## CHAPTER SEVEN

### SCHOOL SERVICES AND LIBRARY FACILITIES

In 10 towns, money was allotted in the budget for the free supply of books, in 14 towns for the provision of meals and in 13 towns for scholarships and stipends separately, whereas in 7 towns money was allotted for all the three items of services. In 13 towns, money was allotted for the free supply of books as well as school meals, while 21 towns had arrangements for free supply of books and for scholarships. On the whole, in 78 out of the 232 towns, some money was allotted either for free supply of books or meals or scholarships and stipends.

The amount allotted varied from Rs. 50 to Rs. 600,000 for free supply of books, from Rs. 314 to Rs. 12,722,800 for meals and from Rs. 100 to Rs. 25,000 for providing scholarships and stipends. Considerable importance was given to these school services in the towns of Tamil Nadu and Uttar Pradesh. The town-wise figures are given in Table VI.

In this connection, the recommendations of the Education Commission (1964-66) are worth mentioning. At the primary stage, the Commission recommended that a programme of providing free text books should be given very high priority and introduced immediately. For the secondary stage, it recommended the creation of book-banks. In addition, the libraries of these institutions should stock a large number of sets of text books so that every student can have access to them in the library and the reading rooms. About scholarships, the report stated that steps should be taken to ensure that at the end of the primary stage, no promising child was prevented from continuing his studies further on account of non-availability of a school, or on account of socio-economic difficulties. To this end, the Commission recommended adequate provision of scholarships. The main object of the scholarship programmes to be developed at the secondary stage would be to ensure that, in any circumstances, the top 15 per cent of the children in the age group do get transferred to secondary schools and that their further education is not prevented by poverty.\*

Information was also collected about the number of schools having permanent buildings in each urban local body. The percentage of schools having permanent buildings is given in Table VI. In as many as 76, *i.e.*, 49.53 per cent of towns, all the schools had permanent buildings. In 55, *i.e.*, 35.71 per cent of the towns, more than 50 per cent of the schools had permanent buildings. Two towns did not have any permanent buildings for their schools.

The playground is an important part of a school. Information about schools having playgrounds on the school campus and outside the school campus is given in Table VI. It was found that 37, *i.e.*, 24.03 per cent of the towns, did not have any playgrounds for their schools either within or outside the school campus. Eighty-nine, *i.e.*, 57.79 per cent of the towns, had playgrounds within the campus of their schools, 4, *i.e.*, 2.60 per cent of the towns, had playgrounds outside the campus of the schools. Twenty-four, *i.e.*, 15.58 per cent of the towns, reported having playground facilities inside as well as outside the school campus. This includes any open space available for recreation and games, irrespective of size. It must be realised that in urban areas the cost of land is high and it is difficult to obtain, whereas the rural schools do not experience any such difficulty. Moreover, in urban areas, the average number of scholars is relatively larger, and the need greater.

---

\* Report of the Education Commission (1964-66), p. 114.

Most of the schools did not have libraries. A good number of schools in the towns of Gujarat, Mysore, Maharashtra, Tamil Nadu had libraries while in the States of Andhra Pradesh, Assam, Madhya Pradesh, Uttar Pradesh and West Bengal the facility was lacking. In many towns, allotments were made in the budgets for the purchase of books for the school libraries. It is interesting to notice that towns in Punjab and Rajasthan have allotted good amounts for the purchase of books for school libraries though they were not managing any schools. Probably this was meant for grants to schools run by other agencies for purchase of books or to other public libraries and reading rooms. The amounts provided in the towns of Andhra Pradesh, Tamil Nadu, Uttar Pradesh and West Bengal were very small compared with the towns of Gujarat, Mysore, Maharashtra and Punjab.

Ninety towns, *i.e.*, 38.79 per cent of all the 232 towns, were maintaining public libraries or reading rooms of one type or the other. The amounts allotted for the maintenance of public libraries varied from Rs. 1,215 to Rs. 7,000 in Andhra Pradesh, from Rs. 1,000 to Rs. 52,000 in Gujarat, from Rs. 500 to Rs. 10,746 in Haryana, from Rs. 1,000 to Rs. 10,000 in Kerala, from Rs. 1,500 to Rs. 10,000 in Madhya Pradesh, from Rs. 130 to Rs. 30,000 in Mysore, from Rs. 10,000 to 17,845 in Maharashtra, from Rs. 3,000 to Rs. 100,000 in Rajasthan, from Rs. 200 to Rs. 6,668 in Tamil Nadu, from Rs. 100 to 11,500 in Uttar Pradesh and from Rs. 1,000 to Rs. 43,000 in West Bengal. The per capita budget provision for public libraries in different towns is also given in Table VI. It was less than 62 paise in all the towns. In some towns, it came to one or two paise, on the average, per head of population.

The library-people ratio in each town was also worked out and is given in Table VI. As in the case of school buildings, here also information about the size of various public libraries and reading rooms could not be collected. The library-people ratio ranged from 20,652 persons per library to 84,335 in Andhra Pradesh, from 21,827 to 89,000 in Gujarat, from 29,168 to 81,000 in Haryana, from 16,000 to 155,380 in Kerala, from 21,123 to 66,688 in Madhya Pradesh, from 14,250 to 145,000 in Mysore, from 19,512 to 383,428 in Maharashtra, from 5,806 to 123,000 in Tamil Nadu, from 25,000 to 580,759 in Uttar Pradesh and from 2,679 to 90,000 in West Bengal.

Coming to museums, only big cities like Ahmedabad, Agra, Baroda, Calcutta, Indore and Greater Bombay were maintaining one museum each.

## CHAPTER EIGHT

### RECREATIONAL FACILITIES

*"Man only plays when, in the full meaning of the word, he is a man, and he is only completely a man when he plays."*

—SCHILLER

The concentration of a large number of people in the urban centres creates the need of recreational facilities for urban dwellers. In the rural areas, where small groups of people live together, the need of organised recreation has not been felt yet; the vast open spaces exist, nature and its consolation is freely available to the people, the seasonal fairs and festivals continue to divert them, and occasional weddings and other functions in the villages provide relaxation to the rural dweller. The tensions and the 'busyness' are less acute. In the urban areas, however, specially in the larger cities, people need to get away from their homes and from their work. Dwellers of high-rise apartment houses, residents of highly congested localities and slum areas do not find much comfort for the soul and the body at home. City life with its heavy traffic and noise, its constant struggle for existence and competition, the absence of private open space overwhelms and suffocates. In affluent communities, people escape into the open country in automobiles or go out fishing, hunting, sea-bathing or bird-watching. In the Indian towns a very small fraction of the population can afford to enjoy such recreation. It is thus very important that the community itself should make arrangements within the city for the enjoyment of leisure and recreation. The absence of such facilities seriously affects the quality of city life and results inevitably in crime, delinquency, morbidity and social disorganisation.

It is hardly possible to define 'recreation' and no universally accepted definition exists in the sense in which the word has been used in this report. However, the general sense is that it is an activity which a citizen undertakes entirely by free choice for using his leisure in a creative way, and, at the end of the indulgence, he is expected to feel refreshed, comparatively rid of tensions and generally elevated in spirits. Naturally, each individual has his own form of leisure and relaxation. In urban areas, it is not possible for individuals themselves to organise facilities for the enjoyment of leisure and it is the local government which has, therefore, to take upon itself the responsibility of looking after this basic need. In many countries, urban local bodies pay a great deal of attention to recreation and spend vast sums of money in providing a variety of facilities for this purpose. As the tension of urban life mounts, more diverse methods of providing recreation are taken recourse to. What is important is that most of the facilities should be within the reach of the poorest sections of the community, with special arrangements for children and women. Besides, the facilities need to be spatially so dispersed that people do not have to travel long distances to seek them out. Of course, certain kinds of facilities will have to be provided on a local or neighbourhood basis, certain others on a whole-city basis. Museums, zoological and botanical gardens, theatres, large parks and stadia, golf courses and the like cannot obviously be provided to every segment of the city but small parks and gardens, play-fields, swimming pools, gymnasias, tot-lots, community centres with indoor games, skating rinks etc. should be within easy access. Cinema halls have, in any case, been coming up.

It has to be borne in mind that for the adequate supply of these amenities land will be required and a proper plan must be made ahead of requirement in this regard. Very often the desire and the ability to provide

the facility is thwarted by unavailability of land at the right place and in adequate quantities. The poor resources of urban local bodies conspire with lack of appreciation of the urgency of the need to deprive the citizen of the facilities. In the meantime, the population continues to grow, housing becomes scarce and densities rise to unbearable proportions, making the situation much worse and solutions still more difficult. Hence, apart from an academic avowal to the cause of urban recreation, local governments must also take practical steps betimes to ensure actual provision of the amenities on the ground. It is not a matter merely of citizen satisfaction but of city health—physical, emotional and intellectual. More even than education, which can still perhaps be efficiently provided, theoretically speaking, by an agency other than the local government, it is hard to see how ordinary recreational facilities at the neighbourhood level can be arranged for by any agency other than the city government.

In almost all municipal/corporation acts, recreational activities of urban local authorities are prescribed either as obligatory or discretionary functions. These include, maintenance of parks and playgrounds, open spaces, planting and preservation of trees, organising exhibitions, fairs and public entertainments, maintaining botanical or horticultural gardens, gymnasias, stadia, swimming pools and promoting physical culture in general. This study reveals a sad neglect of these activities in most urban local bodies.

Out of the 232 urban local authorities which replied to the questionnaire, the information about the budget provision for public recreational activities was supplied only by 53, *i.e.*, 22.84 per cent of the towns. One hundred and forty-two, *i.e.*, 61.21 per cent of towns, did not supply the information about allotment of funds although they incurred some expenditure on this account. The remaining 37, *i.e.*, 15.95 per cent of the towns, did not finance any recreational activities in their areas. In these 53 towns, the percentage of budget allotment for recreation ranged from 0.01 to 7.38. The percentage varied in Gujarat from 0.04 to 7.27 for different towns; in Mysore from 0.01 to 0.84; in Maharashtra from 0.01 to 7.38; in Punjab from 0.01 to 2.09; in Rajasthan from 0.02 to 0.34; in Tamil Nadu from 0.12 to 1.51; in Uttar Pradesh from 0.25 to 1.41.

The per capita budget allotment for recreation in different towns was also worked out and is given in Table VII. It ranged between one paise and Rs. 1.61 per head of population in different towns.

Information regarding the number of parks maintained by each local body is given in Table VII. It would have been desirable to get data about the total area covered by these parks in each town but this item was not included in the questionnaire in view of the difficulties of obtaining reliable data in this regard. The distribution of towns according to the number of parks maintained by the local bodies is given in Statement 16.

Out of the 231 towns that supplied information about parks, 3, *i.e.*, 1.30 per cent of the towns, had more than 100 parks, another 3 between 50 and 99, 7, *i.e.*, 3.03 per cent, between 20 and 49, 14, *i.e.*, 6.06 per cent, between 10 and 19, 35, *i.e.*, 15.15 per cent between 5 to 9, 127, *i.e.*, 54.98 per cent between 1 and 4, while in 42, *i.e.*, 18.18 per cent no parks were being maintained. Thirty-seven, *i.e.*, 16.02 per cent of the towns, out of 231 towns, were maintaining only one park each.

In a very few cities like Sholapur, Poona, Madras and Ahmedabad, zoological and botanical gardens were being maintained while in many towns some parks were being maintained separately for children. In some towns there were separate parks for ladies also.

The park-people ratio for each town is given in Table VII. The number of persons per park varied from 10,250 to 55,728 in the towns of Andhra Pradesh; from 6,000 to 34,256 in Gujarat; from 10,625 to 33,333 in Haryana; from 7,844 to 77,690 in Kerala; from 7,128 to 20,123 in Madhya Pradesh; from 2,358 to 130,000 in Mysore; from 7,250 to 72,727 in Maharashtra; from 5,455 to 60,000 in Punjab; from 6,111 to 35,000 in Rajasthan; from 2,667 to 109,600 in Tamil Nadu; from 4,231 to 92,000 in Uttar Pradesh and from 11,616 to 45,000 in West Bengal.

## Statement 16

## DISTRIBUTION OF THE TOWNS ACCORDING TO THE NUMBER OF PUBLIC PARKS MAINTAINED

S. No.	STATE	NUMBER OF PUBLIC PARKS							TOTAL (TOWNS)
		100 & over	50 to 99	20 to 49	10 to 19	5 to 9	1 to 4	No Parks	
1	2	3	4	5	6	7	8	9	10
1.	Andhra Pradesh	—	—	—	—	3	8	3	14
2.	Assam	—	—	—	—	—	2	—	2

	Percentage	1.30	1.30	3.03	6.06	15.15	54.98	18.18	100.00
	Cumulative Total	3	6	13	27	62	189	231	—
	Cumulative Percentage	1.30	2.60	5.63	11.69	26.84	81.82	100.00	—

In a few towns of Gujarat, Kerala, Madhya Pradesh, Mysore, Maharashtra, Punjab, Rajasthan, Tamil Nadu and Uttar Pradesh, some sports stadia were being maintained. The number of sports stadia varied from 1 to 5 in these states. Local bodies from Andhra Pradesh, Assam, Bihar, Haryana, Orissa and West Bengal did not report the existence of their own sports stadia.

Swimming pools were being maintained in Ahmedabad, Amreli and Jamnagar in Gujarat, Hissar in Haryana, Indore in Madhya Pradesh, Bangalore, Hubli-Dharwar and Mysore in Mysore State, Ahmednagar, Akola, Greater Bombay, Nasik-Road-Deolali and Poona in Maharashtra, Kapurthala and Phagwara in Punjab, Madras and Virudhnagar in Tamil Nadu, Konch in Uttar Pradesh and Calcutta in West Bengal.

Only in the state of Maharashtra, Jalna, Kolhapur and Washim have reported that they were maintaining cinema halls also. Seventeen towns reported having arranged cinema shows for the pupils.

Coming to the number of schools provided with radio sets, 5 towns in Andhra Pradesh, 3 in Gujarat, 3 in Madhya Pradesh, 5 in Mysore, 4 in Maharashtra, 22 in Tamil Nadu and 4 in Uttar Pradesh have reported that they had supplied radio sets to some schools in their jurisdiction.

Recreational facilities can assume numerous forms according to local conditions and it was not possible to include in the questionnaire a larger number of items. Nevertheless, the information received shows that such activities have not been given adequate attention. Their role in enriching civic life has not been appreciated in most urban areas.

## TABLES

**TABLE I**  
**POPULATION AND PER CAPITA BUDGET ALLOTMENT FOR EDUCATION AND RECREATION**

SL. No.	Town/City	District	Area 1968 sq.km.	POPULATION		Density Per sq. km. 1968	PER CAPITA BUDGET ALLOTMENT DURING 1967-68

## APPENDIX I

# QUESTIONNAIRE ON THE EDUCATIONAL AND RECREATIONAL ACTIVITIES OF URBAN LOCAL BODIES 1967-68

### I. GENERAL

1. Town
    - District :
    - State :
  2. Area (approximate as on 31.3.1968) (sq. kilometres or sq. miles)
  3. Population
    - (a) 1961 Census :
    - (b) estimated as on 31.3.1968 (if available) :
  4. Total budget provision for the year 1967-68
    - (a) capital : Rs.
    - (b) revenue : Rs.
- Total Rs. \_\_\_\_\_

### II. EDUCATION

5. Amount allotted to education during 1967-68 by the local body
  - (a) pre-primary : Rs.
  - (b) primary : Rs.
  - (c) other : Rs.

Total Rs. \_\_\_\_\_
6. Amount spent during the year 1967-68 on
  - (a) pre-primary education : Rs.
  - (b) primary education : Rs.
  - (c) other education : Rs.

Total Rs. \_\_\_\_\_
7. Grant, if any, received from the State Government towards education for the year 1967-68 : Rs.
8. Whether education is provided free by the local body :
  - (a) pre-primary : Yes No
  - (b) primary : Yes No
  - (c) other : Yes No

9. Total revenue, if any, to the local body from fees during 1967-68 : Rs.
10. Provision in the budget during 1967-68 for
- (a) free supply of books : Rs.
  - (b) supply of free meals : Rs.
  - (c) stipends and scholarships : Rs.
11. Total number of municipal schools as on 31.3.1968
- (a) pre-primary :
  - (b) primary :
  - (c) other :
12. Number of schools during the year 1967-68 in
- (a) permanent buildings :
  - (b) temporary structures, tents, etc. :
13. Number of children in municipal schools as on 31.3.1968
- (a) pre-primary schools :
  - (b) primary schools :
  - (c) other schools :
- Total \_\_\_\_\_
14. Number of teachers in municipal schools as on 31.3.1968
- (a) pre-primary schools :
  - (b) primary schools :
  - (c) other schools :
- Total \_\_\_\_\_
15. Number of schools with playgrounds of their own
- (a) Pre-primary
    - (i) on the school campus :
    - (ii) outside the school campus :
  - (b) Primary
    - (i) on the school campus :
    - (ii) outside the school campus :
  - (c) Other
    - (i) on the school campus :
    - (ii) outside the school campus :
16. Average distance a child has to cover to go to school
- (a) pre-primary : (kilometre or mile)
  - (b) primary : (kilometre or mile)
17. (a) Number of municipal schools having their own libraries :
- (b) Budget provision in 1967-68 for purchase of books for school libraries : Rs.
18. (a) Number of public libraries maintained by the local body during the year 1967-68 :
- (b) Budget provision in 1967-68 for purchase of books for public libraries : Rs.

19. (a) Number of museums maintained by the local body during the year 1967-68 :  
 (b) Budget provision in 1967-68 for museums : Rs.

### III. RECREATION

20. Number of sports stadia maintained by the local body during the year 1967-68 :  
 21. Amount allotted for expenditure towards public recreational activities by the local body during the year 1967-68 : Rs.  
 22. Number of gardens/parks maintained by the local body during the year 1967-68  
 (a) public gardens and parks :  
 (b) zoological gardens :  
 (c) botanical gardens :  
 (d) parks meant for children only :  
 23. (a) Whether arrangements are made by the local body for cinema shows for pupils : Yes No  
 (b) Whether the local body owns cinema halls : Yes No  
 (number.....)  
 24. Number of schools to which radio sets have been provided by the local body :  
 25. Number of public swimming pools maintained by the local body during the year 1967-68 :  
 General remarks, if any.

## APPENDIX II

### MUNICIPAL ACTS
